

Public Notice

Durham & Neustadt Water System Users

Winter Weather Waterworks

January 14, 2016

This notice is to the users of the Durham & Neustadt Water Systems. This is a friendly reminder that the colder temperatures are moving in for the winter. It is extremely important to make sure that your water lines are protected from the cold.

Tips

- Ensure that the area around the water meter is heated and protected from freezing. (Any damage to private water lines and/or meter is at the homeowner's expense)
- If you are not permanent resident ensure home is kept above freezing and that someone is checking the heat regularly.
- Leave any natural snow cover on or around the water lines under the ground, and near the outside wall where the lines run into the home, as this will insulate the ground from the cold.

If prevention of frozen lines is required, the resident will be notified in writing with a work order by the Municipality of West Grey.

Should you have any questions, please contact the undersigned. Your understanding and cooperation is appreciated.

Municipality of West Grey
Ken Gould
Director of Infrastructure & Public Works
519-369-2200, X 227
